The University of Canberra open day started early with a welcome visit from Patricia Piccinini's Skywhale.

As part of the campus festival the ARstudio, a research group located at the university's new INSPIRE centre distributed a baby skywhale using augmented reality.

You can see the result by following the instructions below. Some 6500 visitors attended open day and we distributed 400 baby whales.

# #WELOVESKYWHALE

Augmented reality offers amazing new ways of connecting the digital world with the real.

Discover our lovely baby skywhale (we call him 'Piccolo') by viewing the front of this flyer through the AR Studio app on your mobile device.

- 

Download the AR Studio app from the app store.
- 

With the app open, point your device's camera at the front of this flyer.
- 

Watch 'Piccolo' come to life.
- 

Tap the screen to be taken to the AR Studio website.
